

Women's Argyle Alpaca Sweater

This sweater is made from expensive high grade alpaca. It's a sweater with unique design and triangular trim, reminiscent of its Incan heritage.

Alpaca is one of the world's rarest natural fibers. It's as soft as cashmere, exceptionally light, and five times warmer than regular sheep's wool. Alpaca is abrasion resistant and maintains its insulating properties even when wet.

Alpaca fiber has little or no guard hair and no lanolin. It is unusually strong and resilient. Fabrics made of alpaca fiber are easy to care for and long lived. Other colors and sizes are available upon request.
